CAREER OBJECTIVE

Passionate **Software Engineer** with expertise in **software development, operating systems, and database management**, along with **machine learning, deep learning** and **Gen AI**. Skilled in building scalable applications, optimizing algorithms, and deploying AI-driven solutions.

PROJECTS

Food Ordering Website

- github.com/MithunKumar04/Food_ordering_website_REACT
- Built a **full-stack web app** with **React, Node.js, and MongoDB** for online food reservations with scheduled pickups.
 - Enabled restaurants to manage menus, reservations, and order statuses in real time.
 - Tech Stack** : React, Node.js, MongoDB.

Game Library

- github.com/MithunKumar04/Game_Center_REACT
- Built a **full-stack web application** with Admin & User login using **React, Node.js, and MongoDB**.
 - Admins can add and manage games, while users can browse, search, sort, and view game details.
 - Tech Stack** : React, Node.js, MongoDB.

Car Price Prediction

- github.com/MithunKumar04/Car_price_prediction_REGRESSION
- Processed large datasets using **Python**, performing feature engineering and data cleaning with **Pandas** and **NumPy**.
 - Developed and fine-tuned machine learning models for accurate price prediction, ensuring scalability and efficiency.
 - Tech Stack** : Python, Pandas and NumPy.

INDUSTRIAL EXPERIENCE

Intel Unnati Industrial Training - 2024

Intel

05/2024 - 07/2024

Participated in training on **Inference on CPU** and **Fine-tuning of LLMs** to build a custom chatbot. Gained hands-on experience in optimizing AI model performance on CPUs and adapting LLMs with domain-specific data for improved chatbot responses.
